

ELEVORIX
— ACADEMY —

AI & AUTOMATION FOUNDATIONS DIPLOMA

No prior experience. No specific job. Just the ambition to master AI.

General Practitioner Track • Open Enrollment • ~44 Hours • ~11 Weeks

The AI Skills Opportunity

The Reality

- AI skills are the fastest-growing demand in the job market
- Freelancers who automate their work earn more and stress less
- Students with AI portfolios stand out in every hiring process
- Entrepreneurs who use AI run leaner, more profitable businesses
- Most people using AI are doing it at 10% of its actual potential

The Gap

- ✗ Technical AI courses assume coding knowledge most people lack
- ✗ "AI for Business" courses are too superficial to produce skills
- ✗ YouTube tutorials don't build organized, deployable capability
- ✗ No program designed for open enrollment across any background
- ✗ Courses that teach one tool — not how to choose between them

This diploma builds genuine, demonstrable AI and automation capability — for anyone motivated to learn.

Program Overview

~44h

Foundation + General Track
modules over 11 weeks

Open

Enrollment — no employer
or prerequisites required

No

Prior experience needed
All backgrounds welcome

What You'll Build:

- ✓ Personal AI workflow portfolio across 3+ automation tools
- ✓ Live automation that saves time in your real daily work
- ✓ Demonstrable skills to show in job interviews or client pitches

 Format: 2 × 2h/week, live Hybrid (online - offline)

 Duration: ~11 weeks (~44h total)

 Open enrollment — any background

 Platform: Google Meet

 English delivery + Arabic support materials

 Certificate/Diploma upon successful completion

The Anti-Hype Promise

What makes this different from every other AI course

We Show Failures

Every module includes "what breaks and why" — not just polished success demos

We Teach Limitations

Learn what AI cannot do before celebrating what it can — honest, complete education

We're Honest About Costs

Real cost analysis of every tool — free, paid, and self-hosted options compared

We Build for Real Life

Automations that survive reality, not just demos that work once in a clean environment

"The kind of program that quietly outperforms loud marketing courses — because it produces people who actually understand what they're building."

Who Should Enroll?

✓ Perfect For:

- ✓ University students and fresh graduates seeking AI credentials
- ✓ Career changers building AI skills for their next role
- ✓ Freelancers wanting to automate client work and delivery
- ✓ Entrepreneurs and small business owners reducing overhead
- ✓ Working professionals future-proofing their skill set
- ✓ Anyone curious about AI who wants real skills, not buzzwords

✗ Not Suitable If:

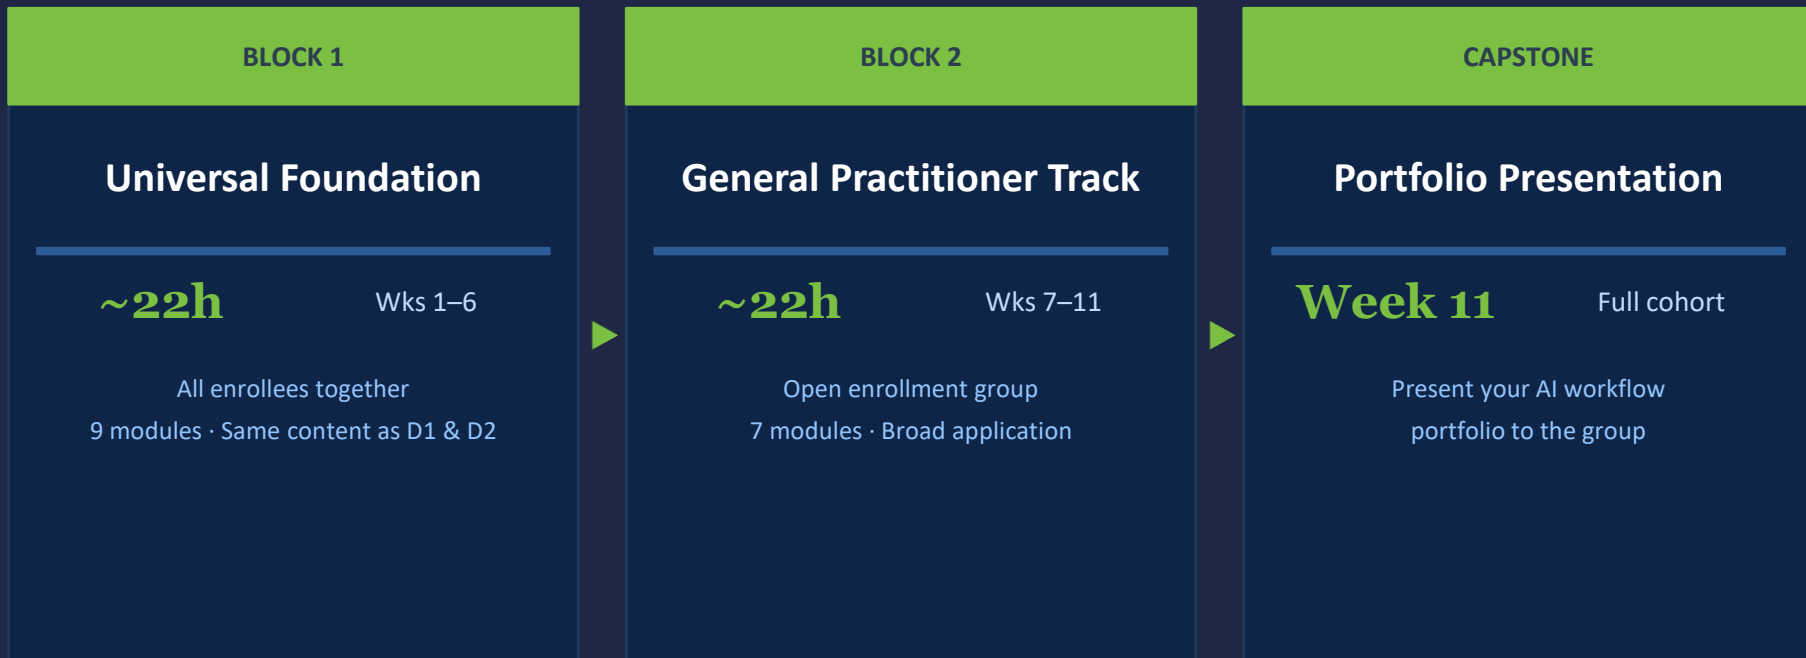

- ✗ You want "AI will do everything for me" with zero effort
- ✗ You're not comfortable with trial, error, and iteration
- ✗ You expect expert-level mastery from an 11-week program
- ✗ You can't commit 4 hours/week for 11 weeks

No prerequisites required • No coding experience needed • All backgrounds welcome

The Learning Journey

The same Universal Foundation as D1 & D2 — then a curated General Track drawing the highest-value content from all 7 department tracks.

Foundation Modules 1–3: Build Your AI Foundation

F01 • 2.5h

What Is AI & Why Now

- AI categories demystified simply
- How LLMs actually generate responses
- The Anti-Hype evaluation framework
- What AI can and cannot do honestly

Outcome: Accurate mental model — no hype, no fear

F02 • 2.5h

AI Tools Ecosystem

- ChatGPT · Claude · Perplexity · Gemini
- Compare tools for your specific use cases
- Tool Selection Decision Matrix applied
- Side-by-side trial with real tasks you choose

Outcome: Personal AI toolkit selection for your work

F03 • 2.5h

Prompt Engineering

- RCTF framework for reliable outputs
- Prompt patterns that work for any task
- Vibe Coding — directing AI without code
- When to rewrite vs iterate prompts

Outcome: Prompt skills that produce results every time

Foundation Modules 4–9: Automate Your World

F04–F05 • 4.5h

Automation & Integration

- Find automation in any daily workflow
- Zapier live build — your first automation
- What APIs are — explained for non-coders
- Connect any two tools without code

Outcome: Your first working personal automation

F06–F07 • 5.5h

Platforms & Agents

- Zapier vs Make — which is right for you
- Build and debug a real workflow in class
- What AI agents do — Manus AI demo
- Review an agent output before using it

Outcome: Production automation + agent evaluation skill

F08–F09 • 4.5h

Safety & Strategy

- Data safety with AI tools — the real rules
- Using AI legally and responsibly
- Present your AI skills confidently
- Group Foundation Project presentations

Outcome: Safe AI use + sharable skills portfolio

Track.C • 2h — Capstone: Your AI Workflow Portfolio

Tools & Technology Stack

Minimal tools, maximum learning. Free tiers covered for everything. Paid upgrades honestly evaluated.

Core Tools

ChatGPT

Writing, research & content creation

Claude

Analysis, documents & precision tasks

Perplexity

Real-time research with source citations

Zapier / Make / N8N

Personal automation without code

Notion AI + Airtable

Productivity & data organization

Free vs Paid vs Self-Hosted

| Option | Pros | Cons |
|-------------|------------------------|------------------|
| Free | No cost, quick start | Limited features |
| Paid | Full features, support | Monthly cost |
| Self-hosted | Full control, privacy | Requires setup |

What's Included:

- ✓ Complete setup guide for all tools
- ✓ Free tier access for every platform
- ✓ Honest comparison: free vs paid vs self-hosted
- ✓ Templates for every automation built

What You'll Be Able To Do

After completing this diploma, you will have practical, demonstrable skills:

Technical Skills

- ✓ Build working n8n / Zapier workflows
- ✓ Integrate APIs & webhooks without code
- ✓ Use AI tools for 10+ real task types
- ✓ Write basic JavaScript with AI assistance
- ✓ Deploy personal productivity automations

Strategic Thinking

- ✓ Identify automation in any workflow
- ✓ Choose the right tool for any use case
- ✓ Design failure-resistant systems
- ✓ Understand real cost implications
- ✓ Communicate your AI skills with evidence

Mindset Shifts

- ✓ Think critically about AI capabilities
- ✓ Recognise hype vs genuine capability
- ✓ Design for production, not demos
- ✓ Embrace failure as part of learning
- ✓ Maintain healthy, useful AI skepticism

Upon Completion: AI & Automation Foundations Diploma — General Practitioner Track • Digital credential for LinkedIn • Lifetime validity

Schedule & Logistics

NEXT COHORT

Starts: Saturday, April 4, 2026

Time: 8:00–10:00 PM Cairo Time

Platform: Google Meet

Duration: ~11 weeks • Open enrollment (anyone can join)

Session Schedule

| Period | Dates | Content |
|--------------------|--------------------|--|
| Weeks 1–3 | April 4, 11, 18 | F01–F05: AI tools, prompts, automation basics |
| Weeks 4–6 | April 25, May 2, 9 | F06–F09: Platforms, agents, governance + Foundation Project |
| Weeks 7–9 | May 16, 23, 30 | Track.1–Track.4: Career AI, processes, content, personal builds |
| Weeks 10–11 | June 6, 13 | Track.5–Track.C: Freelancer/entrepreneur AI + Portfolio Capstone |

Early Bird Deadline: April 1 • Enrollment Closes: April 2 • Program Ends: June 14, 2026

Included in Enrollment:

- ✓ 18–22h Foundation + 22h Track = ~44h live instruction
- ✓ All course materials & resource library
- ✓ Lifetime access to recordings

- ✓ Setup support for all tools
- ✓ Certificate of Completion upon passing
- ✓ Lifetime alumni community access

Why Elevorix Academy?

Practical & Honest

We show failures, teach limitations, and build for reality — not polished demos that never survive contact with real work

Story-Driven Learning

Progressive curriculum that builds naturally from simple working tools to complex automated systems

Expert Instruction

Learn from practitioners who have built production AI systems — not instructors who only know the slides

Community Support

Join a network of learners, get help when stuck, share wins, and build lasting peer connections

Recognized Credential

Foundations Diploma valued by employers and clients seeking automation professionals with proven skills

Lifetime Access

Keep all recordings, materials, templates, and community access forever — yours even after the program ends

Ready to Get Started?

3 Simple Steps to Enroll:

1

Visit Website or Email

Go to www.elevorix.org or email ceo@elevorix.org — introduce yourself and ask about the next available cohort

2

Register & Pay

Secure your spot — Early Bird pricing available

3

Get Started

Receive your setup guide, join the cohort Notion workspace, and be ready for Week 1
